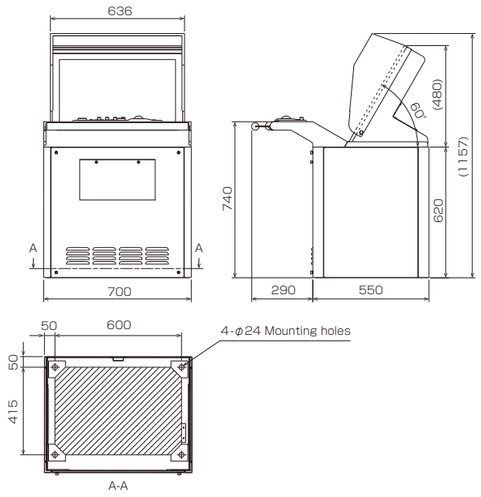
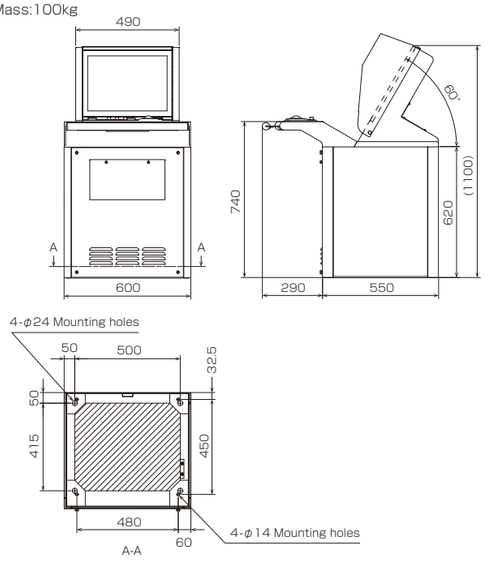
(Unit: mm)

Stand alone type

EC-8600
Mass:120kg

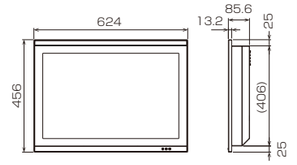


EC-8100
Mass:100kg

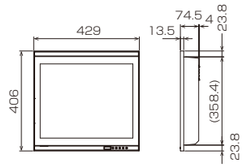


Unit type

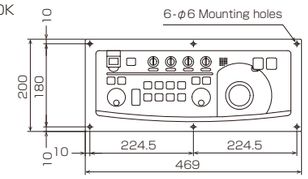
EC-8600K
26 inch LCD Monitor
Mass:14.5kg



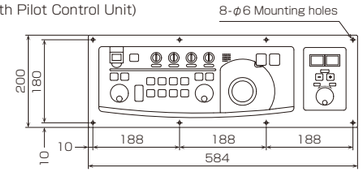
EC-8100K
19 inch LCD Monitor
Mass:6kg



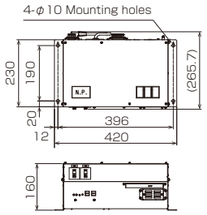
EC-8600K / EC-8100K
Operation Unit
Mass:3kg



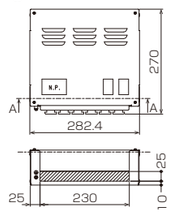
Operation Unit (with Pilot Control Unit)
Mass:4kg



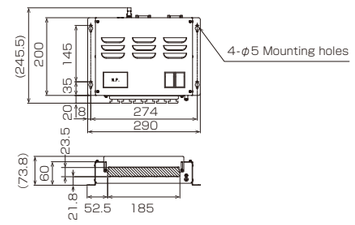
EC-8600K / EC-8100K
Control Unit
Mass:10kg



EC-8600K / EC-8100K
Serial I/F Unit
Mass:4kg



EC-8600K / EC-8100K
Radar Overlay Unit
Mass:2kg



Design and specifications are subject to change without prior notice, and without any obligation on the part of the manufacturer.

⚠ CAUTION Before operating this equipment, you should first thoroughly read the operator's manual.

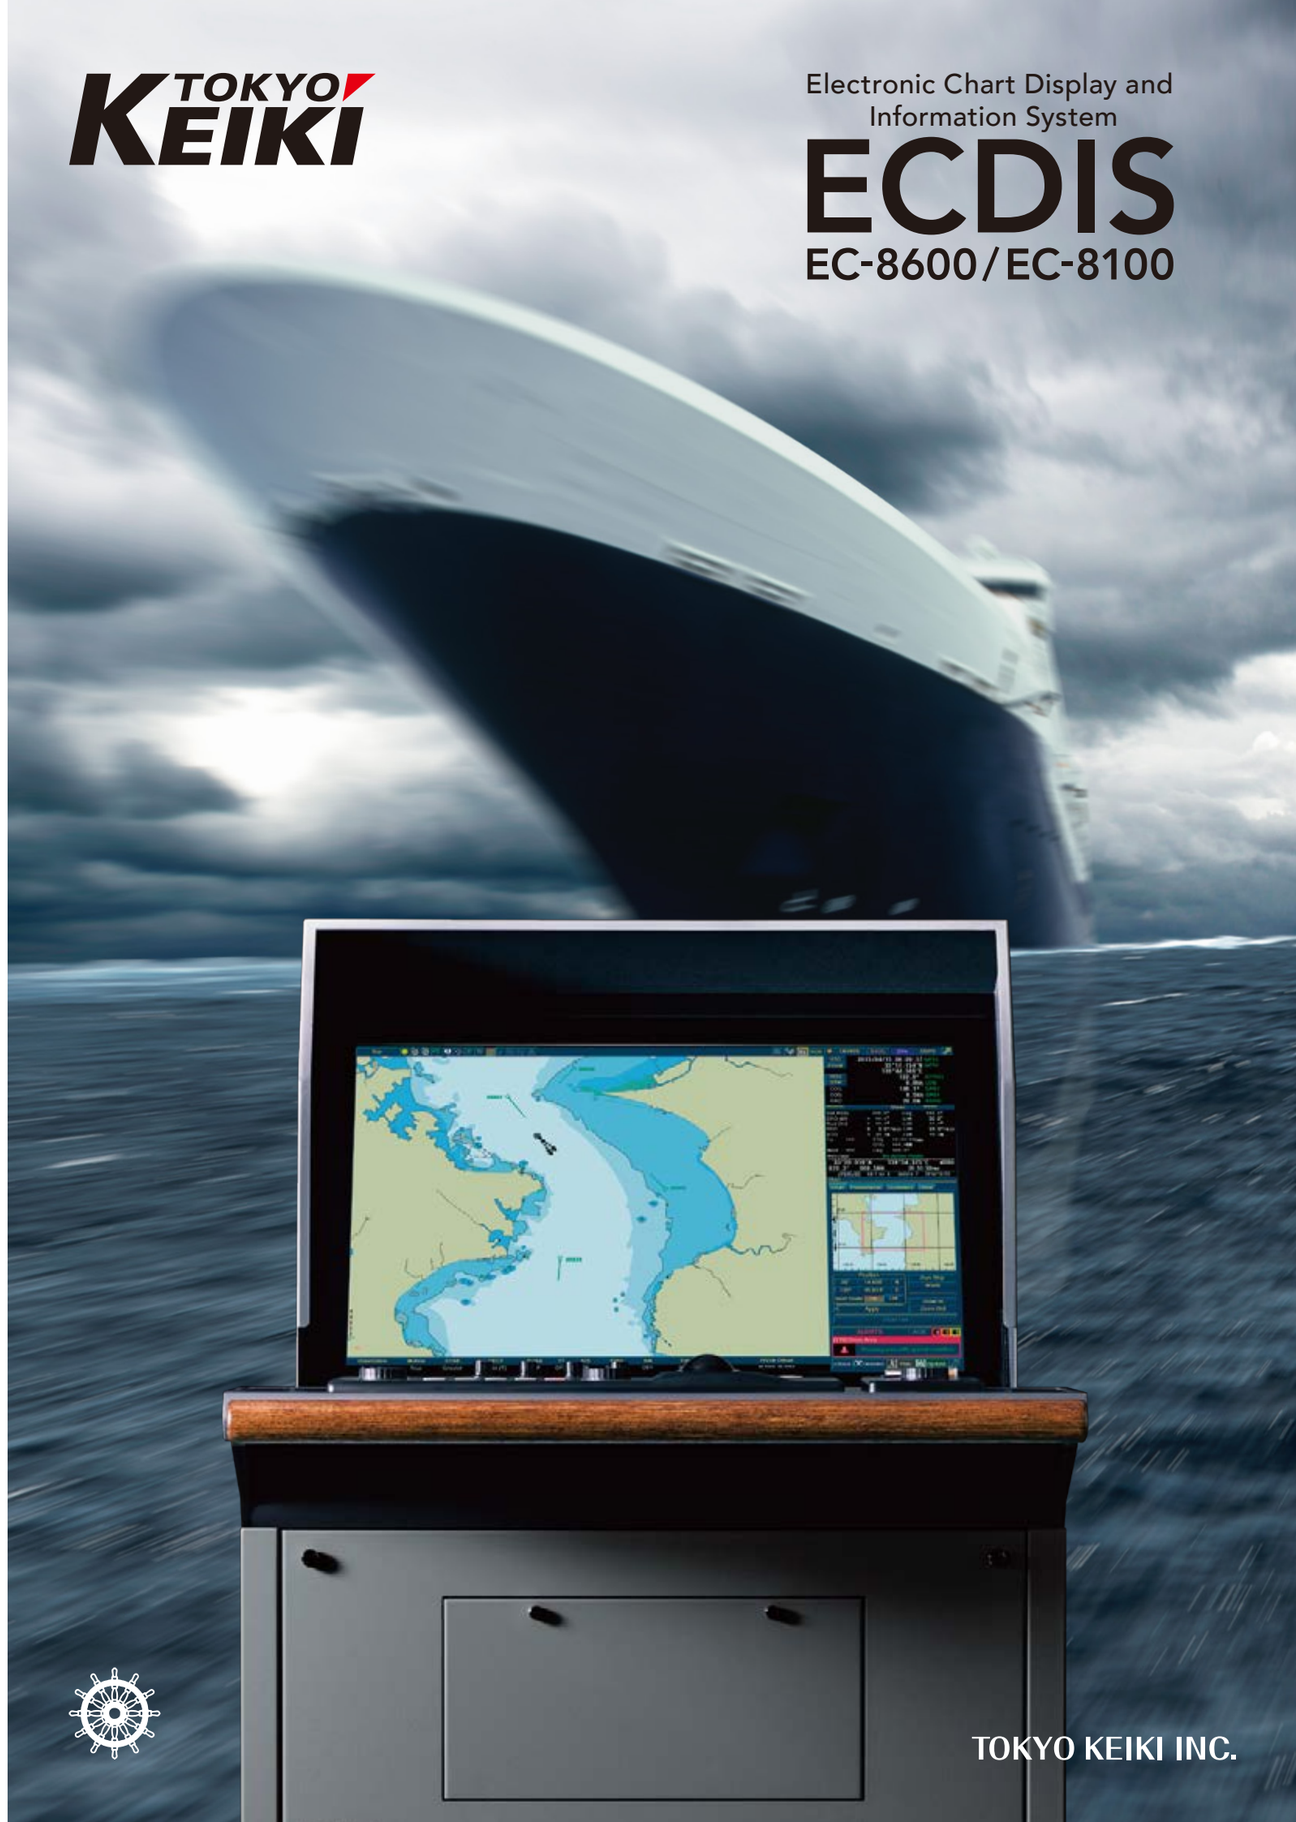
TOKYO KEIKI

Electronic Chart Display and Information System

ECDIS

EC-8600 / EC-8100

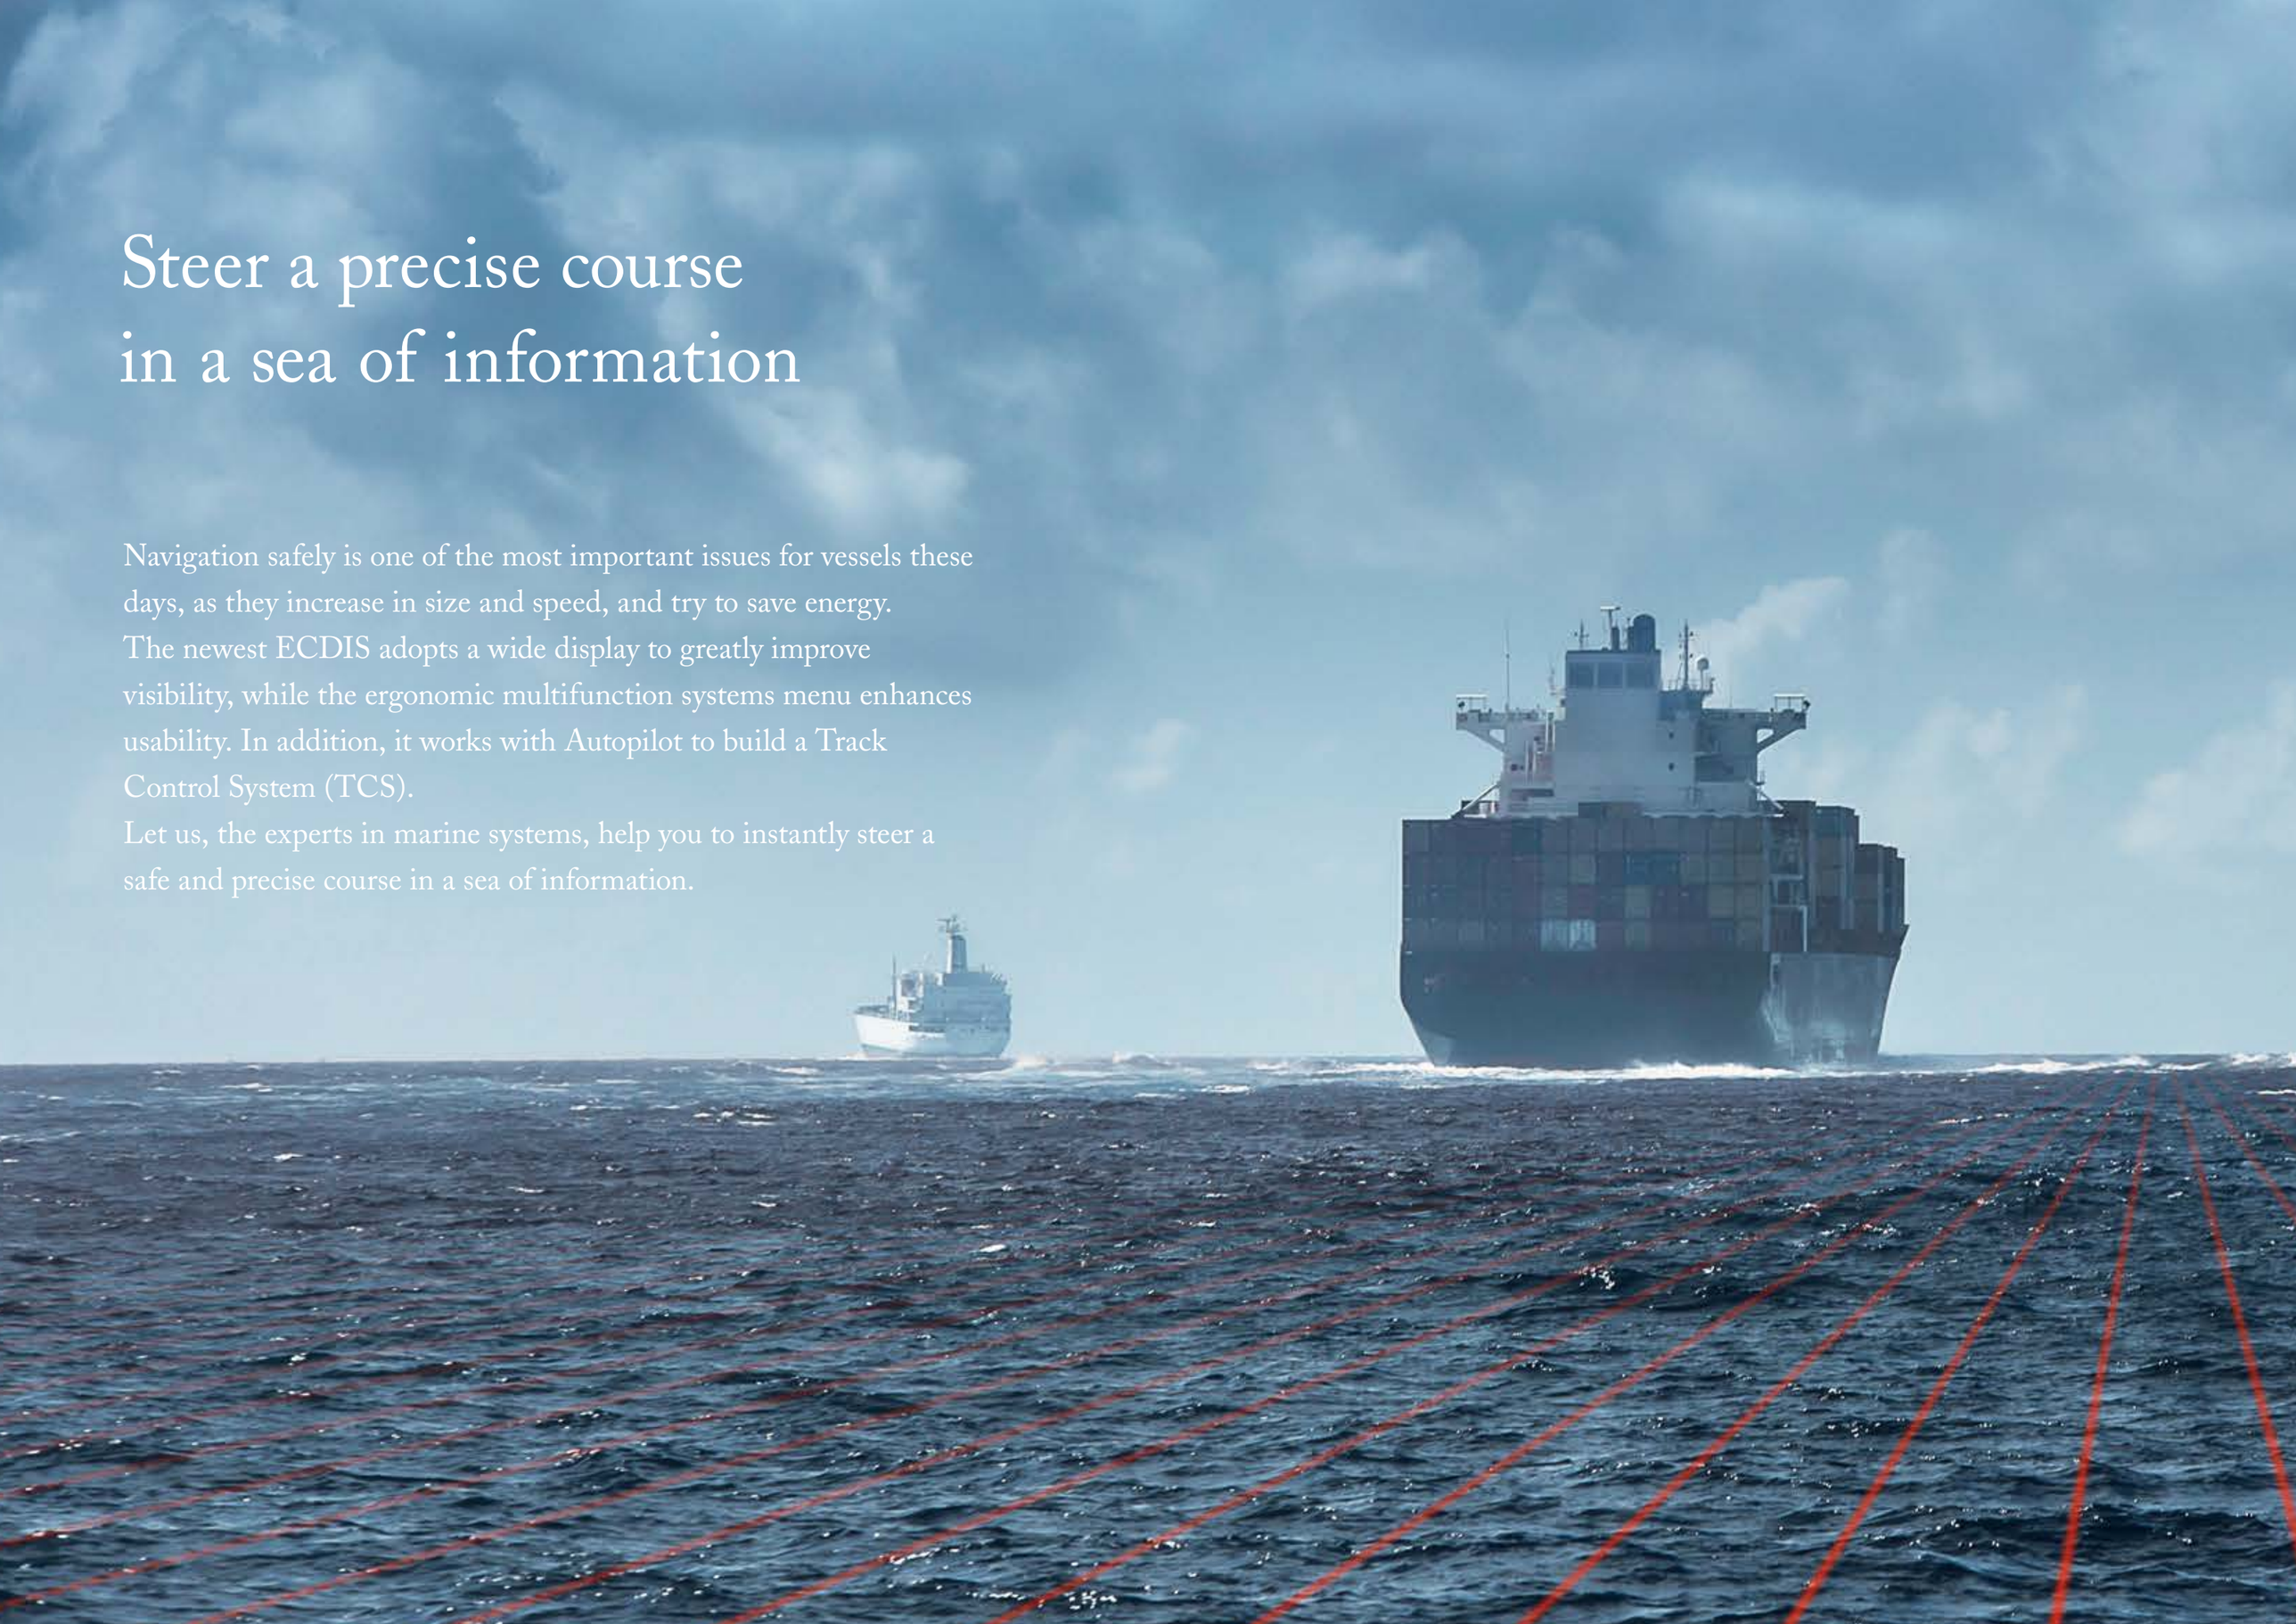


TOKYO KEIKI INC.

Steer a precise course in a sea of information

Navigation safely is one of the most important issues for vessels these days, as they increase in size and speed, and try to save energy. The newest ECDIS adopts a wide display to greatly improve visibility, while the ergonomic multifunction systems menu enhances usability. In addition, it works with Autopilot to build a Track Control System (TCS).

Let us, the experts in marine systems, help you to instantly steer a safe and precise course in a sea of information.



EC-8600
EC-8100

EC-8600 Stand alone type

TOKYO KEIKI's latest Electronic Chart Display and Information System, the EC-8600/EC-8100 series. In addition to conformity to the latest International Rules and Regulations, TOKYO KEIKI's own ideas and functions are incorporated which contribute and support to a most safe and efficient voyage.
Especially, required information can be called upon anytime and easily when needed, a concept by TOKYO KEIKI having such a broad experience for Navigation Equipment.
By using this new ECDIS, you will see and experience first hand a safe and most efficient voyage.

Features

- New 26 inch wide screen LCD display (EC-8600/EC-8600K)
  WUXGA 1920x1200 wide screen pixel support
- AIO display support
  T&P Notice to Mariners (T&PNMs:Temporary related notices) and AIO (Admirality Information Overlay) can be displayed as supplimental information on the ENC chart
- INS conformity AMS response
  Centralized management of all alerts from each Navigation Equipment (Alert Management System)
- Fast installation of ENC charts. (Install time reducted to 1/3)
- Possible to connect to VDR
- Easy software upgrade onboard by ship's crew

*AIO is a free service used by UKHO

Display example

Navigation monitoring

Selected Route route check (dangerous objects/collision avoidance), route monitoring (Off Track, Grounding avoidance) and Own Ship's Guard Frame display dangerous information (With regards to the conditions set)

Chart area magnified display

Wide range chart display is available without adjustment to the Chart scale (One click magnification function available)

AIO display (Option)

The AIO display function displays T&PNMs (Temporary related notices) and supplimental information used by each country's Hydrographic Office on the ENC chart. This gives the possibility for recent changes and navigation warning related information not shown on ENC to be displayed and acknowledge in a timely manner by the navigator.

Alert information display

Each Alert is separated into 3 grades, ALARM (Red) / WARNING (Orange) and CAUTION (Yellow), and are displayed in the order of priority.

Conning display (Option)

Each type of navigation information (ship's heading, ship's speed, rudder angle, wind speed / direction) can all be displayed on one screen allowing for efficient confirmation. With one click, it is possible to interchange the ECDIS display and the Conning display. There is also possibility for installation of a remote conning display in a different location.

Note: ECDIS Display and Conning Display change-over is only possible with backup ECDIS

Track Control System : TCS (Option)

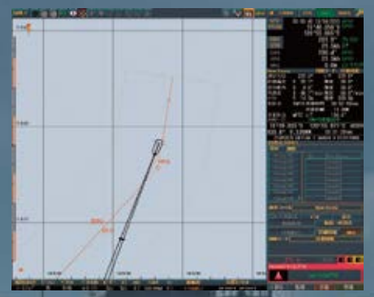
The EC-8600/8100 series can be incorporated with the PR-9000/6000 (HCS) and
TCS is possible via the new adaptive NCT method or the PID method.

・Superior control with the latest control technology New Adaptive NCT which contributes to efficient navigation.

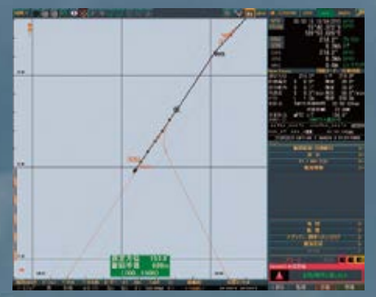
・PID method is superior with regards to cost performance.

Planned Route approach → WPT passing → Dangerous vessel avoidance navigation

When the start WPT is selected at the start of TCS, the selectable portion of the route is highlighted. From the own ship to the selected start WPT, the most suitable temporary route is automatically created which gives possibility for a smooth approach into the planned route.

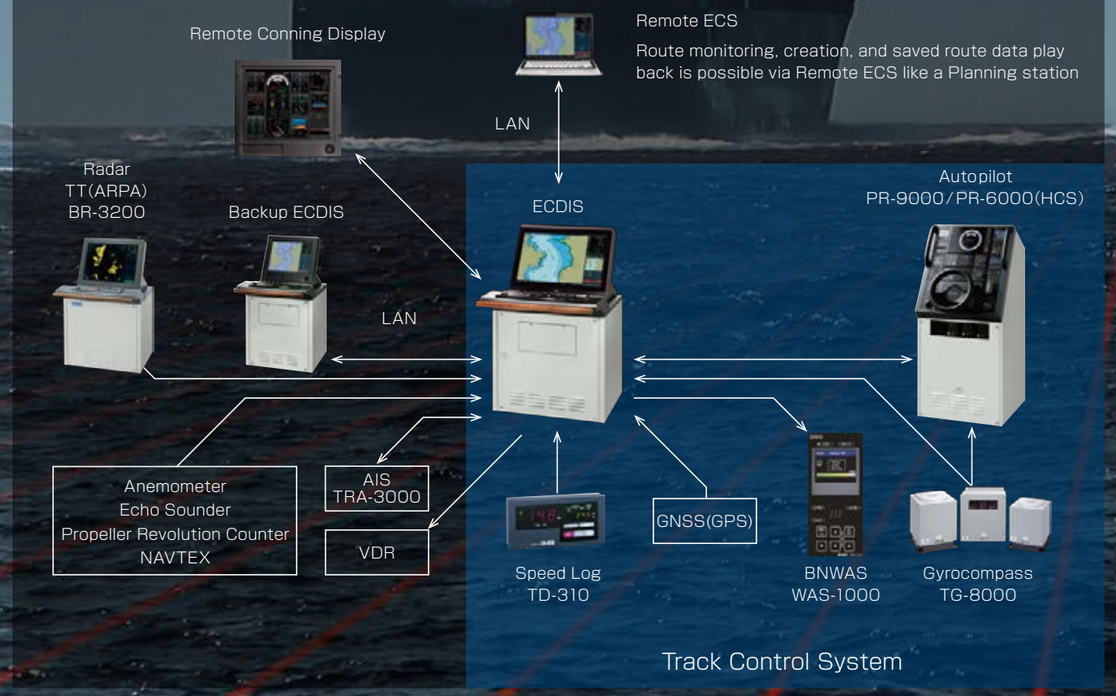


Based on position information from the GPS, automatic navigation can be performed on a planned route and the most suitable automatic waypoint passing can be performed via the use of TCS.



Avoidance steering is possible with regards to the various conditions. With the Pilot Control Unit (Option), a new route can be made from the ship's bow direction and the ship's course can be altered along the route using HCS.

Configuration



Specification

(1)Display

■LCD
19 inch(EC-8100 / EC-8100K)
26 inch(EC-8600 / EC-8600K)
TFT color LCD panel
■Effective display range
376×301mm(EC-8100 / EC-8100K)
550.08×343.8mm(EC-8600 / EC-8600K)
■Resolution
SXGA(1280×1024 pixels EC-8100 / EC-8100K)
WUXGA(1920×1200 pixels EC-8600 / EC-8600K)
■Display
TFT Active Matrix model
■Display colors
Max.16.7million colors

(2)Mode

■Operation mode
Planning,Monitor,Update
■Display mode
North Up,Course Up,Route Up,True motion and Relative motion

(3)Function

Chart display,Ship position fixing,Target positioning measurement,
Route planning,Route monitoring,24 hours/3 months navigation
record and play back,Navigation memo and No-go line/No-go area,
Tracked trget infoemation display,AIS target information display,
System self-diagnosis

〈Option〉
Track Control(TCS),Radar overlay,AIO display,Conning display,
Pilot Control Unit,ARCS chart display,Slave display,
Remote ECS connection(up to 3 connection),Back-up ECDIS connection

(4)External input /output signals

〈Input〉
■Position fixing
IEC61162-1 Ed.1, Ed.2, Ed.3 and Ed.4 GNS, GGA, RMC, GLL, VTG, ZDA, DTM
■Gyrocompass
IEC61162-1 Ed.1, Ed.2, Ed.3 and Ed.4 HDT, ROT, THS,
IEC61162-2
■Speed Log
IEC61162-1 Ed.1, Ed.2, Ed.3 and Ed.4 VBW, VLW
■Echo Sounder
IEC61162-1 Ed.1, Ed.2 DPT, DBT
■Anemometer
IEC61162-1 Ed.1, Ed.2, Ed.3 MWV, MWD
■Tracked target
IEC61162-1 Ed.1, Ed.2, Ed.3, Ed.4 TTM, RSD, OSD, TTD
IEC62388 Ed.2
■Radar
Video,Trigger,Antenna rotation,and Heading signals
■NAVTEX
IEC 61162-1, Ed.1, Ed.2, Ed.3 NRX
■Propeller revolution
IEC 61162-1, Ed.1, Ed.2, Ed.3 RPM

〈Input/Output〉
■AIS
IEC61162-2 VDM, VDO
■Autopilot (HCS)
IEC61162-1, 2(Input)HTC, ZDA etc.(Output)HTD, RSA, ALR

〈Output〉
■Slave display
RGB image (up to 2 displays)
■Remote ECS
Route file,System data
■Backup ECDIS
Route file etc
■BNWAS
■Conning display
■Printer (Remote ECS I/F)
Waypoint list etc

(5)Power

AC100/110/115/220V, DC24V
300VA(AC), 320W(DC)

(6)Operating Environment

Temperature 0～+45℃
Humidity 30%～90% RH(35℃)
Vibration IEC-60945 Ed.4 Protected type

(7)Display Chart

ENC(IHO S-57 Ed.3.1), C-Map(CM93 Ed.3), ARCS

Models

	26 inch Display Unit	19 inch Display Unit
